Meter Reading Schedule | 2027

Your smart meter

Your smart meter uses digital technology to securely transmit your electricity usage information directly to us. That means we don't have to send our field representatives out to read your meter.

Here's how to determine the dates we'll electronically read your meter:

1) Locate your billing cycle on your bill (see example on right).
2) Find your cycle number in the **Cycle** column on the schedule (see page 2).
3) We'll read the meter on the date for each month of that row.
