

INCENTIVES

Commercial Services

for Food Service Equipment

SMUD provides financial incentives to food service equipment contractors to install energy efficient equipment in our customers' facilities. Although, customers may apply for SMUD incentives if they are not working with a contractor. The incentives help offset

the cost to purchase energy efficient equipment, and the investment continues to deliver energy savings over the life of the equipment. SMUD also offers financing.

Energy efficiency incentives are one of the ways SMUD helps customers lower their electric bills and continues to provide lower rates for all our customers.
