Commercial & Industrial Lighting

Referral Contractors List

The contractors on this reference list have worked with SMUD on energy efficiency retrofit projects in the last 12 months.

This list does not constitute an endorsement by SMUD or authorize contractors or their employees to represent themselves as SMUD agents. This list does not guarantee the status of a contractor's license, insurance or workmanship standards.

This list is intended only as a convenience to assist in locating contractors who have experience working with SMUD.

***** The contractors identified by the three asterisks have performed lighting retrofit projects under the Small Commercial Prescriptive Lighting Program. This information is provided for information purposes only.**

SMUD is not liable for any work performed by the contractors on the reference list.

Financing is available for SMUD customers installing eligible equipment.

SELECTING A CONTRACTOR

SMUD encourages the use of licensed contractors. Check the status of a contractor's license at:

- http://www2.cslb.ca.gov/CSLB_LIBRARY/license+request.asp.
- 800-321-2752

SMUD recommends that you request proposals or quotes from several contractors.

DETERMINE IF YOU NEED A BUILDING PERMIT

Many types of lighting and HVAC work require a building permit issued by a city or county planning department. Recipients of incentive payments must attest that all required permits have been obtained.

For projects within the City of Sacramento, contact:

<http://www.cityofsacramento.org/dsd/building/permits/index.htm>

916-808-2534

For projects within the County of Sacramento, contact:

<http://www.msa.saccounty.net/buildinginspection/permits.htm>

916-875-5793 (Bradshaw)

916-874-6928 (Downtown)

For projects outside of the County of Sacramento, contact your local planning department.

PROTECT YOUR ENVIRONMENT, DISPOSE OF HAZARDOUS WASTE PROPERLY

The project Notice of Completion (NOC) requires all contractors or business owners who apply for an incentive to attest that hazardous wastes have been disposed of properly. Please help protect our environment by ensuring that all Hazardous and Universal wastes are disposed of properly. The following are some hazardous and universal wastes that may result from energy efficiency retrofits.

- **Air conditioning and refrigeration equipment cannot be disposed of without the refrigerant being recycled. [Section 608](#) of the Federal Clean Air Act requires that all persons who maintain, service, repair or dispose of appliances that contain regulated refrigerants be certified in proper refrigerant handling techniques. Please ensure that your HVAC contractor has a valid EPA Refrigerant Certification Type 608.**

The Business Environmental Research Center B.E.R.C. (www.sacberc.org) is a free and confidential resource to assist businesses with permitting and compliance issues, should you have further questions.
