Integrated Design Solutions

Use efficient electric technologies to receive financial incentives, save on energy costs and reduce carbon dioxide emissions

SMUD’s Integrated Design Solutions program provides incentives for you to choose energy-efficient, electric equipment in your new or extensively renovated commercial building. Owners can receive up to $150,000 depending on the size and complexity of the building, and the design team may receive up to $50,000 for innovative design.

Benefits to the Owner:
- Better for the environment
- Improve market appeal to sustainably-minded tenants
- Financial incentives for efficient designs
- Straight-forward program requirements
- Potential reduction of infrastructure costs

Benefits to the Occupant:
- Reduced energy bills and operating costs
- Reduce or eliminate natural gas bills and onsite combustion, improving local air quality
- Greater convenience, safety, health, and control with efficient electric technology

Benefits to the Design Team:
- No-cost assistance and training in electric technologies
- Preparation for future local or statewide code changes that require electrification

For questions, or to begin the application process, email IntegratedDesign@smud.org or call 916-732-5095.

Powering forward. Together.
Program Overview

There are two ways to participate:

A. Modeled Approach

Calculate energy savings specific to your building and receive up to a maximum $150,000 owner’s incentive and up to a maximum $50,000 design team incentive:

- Best for larger or more complex buildings with non-standard equipment or processes
- Requires calculations and energy modeling using Title 24-compliant software
- SMUD involvement must begin as early as possible and prior to 100% design development for the Owner and 50% schematic design for the Design Team.

B. Equipment Menu

Choose equipment that meets SMUD specifications and receive up to $50,000 in incentives:

- Best for smaller or less complex buildings
- Incentives are based on simple equipment choices
- SMUD involvement must begin early or there must be evidence of intent to purchase traditional, natural-gas equipment prior to awareness of the program

<table>
<thead>
<tr>
<th>Types of Savings</th>
<th>Owner Incentive</th>
<th>Design Team Incentive</th>
</tr>
</thead>
<tbody>
<tr>
<td>Traditional electric-to-electric energy efficiency</td>
<td>$0.10 per kWh</td>
<td>1/3 of Owner</td>
</tr>
<tr>
<td>Gas-to-electric conversions</td>
<td>$0.30 per kWh-equivalent</td>
<td>1/3 of Owner</td>
</tr>
</tbody>
</table>

Bonus: $1.00 per square foot

Requires an all-electric building without a natural gas meter and without gas plumbing in the building.

Available for both incentive types: Modeled or Equipment Menu

Maximum $25,000 (pending budget availability)

For complete program rules & restrictions and to begin the application process, email IntegratedDesign@smud.org or call 916-732-5095. A Procedures manual is available at smud.org/IDS.
