

New and improved online business tools

Your business experience with SMUD's My Account just got better. We've added new features to make it easier for you to track, control and manage your energy use.

Check out the new features:

- Easier to view dashboard.
- Direct access to your dedicated Strategic Account Advisor.
- New tools in your energy toolkit.

You can also view your energy usage to show 15 minute intervals and demand.

Take control of your bill, so you can focus on bigger priorities with your business. Log in or enroll now at smud.org/MyAccount.

Powering a sustainable future

At SMUD, we've been powering local businesses like yours with safe, low-cost, reliable and clean power for more than 70 years. As an environmental leader in Sacramento and across the nation, we're doing our part to reduce environmental impact, improve regional air quality and create a sustainable future for our community.

Currently, our power is about 50% carbon-free through a mix of energy sources such as solar, wind, hydro, biomass and

geothermal. We're committed to delivering 100% net-zero carbon electricity by 2040, 5 years ahead of California's goal. We're developing and supporting building and transportation electrification, investing in carbon-reducing

technology and powering homes and businesses with clean energy programs.

Learn more about SMUD's commitment to environmental leadership at smud.org/CleanEnergy.

Free energy workshops & trainings

SMUD regularly holds a variety of educational classes and workshops that fit your business needs. Unless otherwise noted, classes are held at the SMUD Customer Service Center, 6301 S. St., Sacramento. Registration is required. Call 916-732-6738, or visit smud.org/Workshops to register.

Introduction to life cycle cost analysis Wednesday, April 8, 2020 | 8:30 a.m. - 12:30 p.m.

Hob Issa, Vice President of Lincus, will guide participants through real-life case studies to calculate the total cost of an energy efficiency project based on investment costs as well as future operational costs. Practice with the software used for LCC Analysis, and work through practical examples to apply to your own projects.

2019 Title 24: Mechanical Thursday, April 9, 2020 | 8:30 a.m. – noon

California's 2019 Title 24 Energy Standards took effect on January 1, 2020. Martyn Dodd, President of EnergySoft, will cover the numerous changes to the residential and nonresidential mechanical sections including HVAC efficiencies, ventilation, exhaust, domestic hot water and forms. •

Wonder why our rates are so low?

We're community-owned, not-for-profit
