

More than a utility

As your community partner, we're here to help your business grow and prosper. Here are some of the ways we're helping our business community thrive:

Economic Development

Our Economic Development team attracts and retains businesses to our region by providing low rates, reliable power, custom energy solutions and incentives and innovative technology.

If you're a small business, you can also count on us to be your trusted partner.

SMUD awards \$200 to \$300 million in contracts every year, \$40 to \$60 million of which go to small businesses that participate in our Supplier Education and Economic Development program (SEED). The program helps local small businesses compete for contracts in construction, information technology, commodities, supplies, maintenance and professional services.

We're committed to awarding 20% or more of all contracts to SEED vendors.

Register your business today at smud.org/SEED.

Greenergy®

SMUD offers you an easy, affordable way to support renewable energy and be recognized for your commitment to the environment.

Through SMUD's Greenergy® program, we offer businesses the option to meet their energy needs with renewable resources. It's an easy, low cost way for a greener future.

Join more than 2,000 local businesses who made the switch to a more sustainable future. Learn more at smud.org/Greenergy.

Electric vehicles

With the growing number of electric vehicles on the road, we're offering commercial charging incentives for businesses that purchase and install electric vehicle charging infrastructure. It's good for your business, your employees and the environment.

You'll demonstrate your environmental leadership, while giving employees who own or are considering an electric vehicle a place to charge during the workday. Learn more at smud.org/DriveElectricBusiness. •

Strengthening our neighborhoods. Together.

Our Sustainable Communities initiative helps bring environmental equity and economic vitality to all communities in our service area, with special attention given to historically underserved neighborhoods.

We're partnering with private industries, government agencies and nonprofits to invest in and implement programs that provide access to proven indicators of community success, such as economic prosperity, quality education and a healthy environment.

See some of our partnerships and the work we're doing at smud.org/SustainableCommunities. •
