## Drive the future of clean transportation

We're powering a clean transportation future by offering a \$599 incentive to charge free for 2 years (the average cost to charge your plug-in electric vehicle (EV) for 2 years), or a 240-volt high powered EV charger when you purchase or lease a new plug-in EV.

Demonstrating your environmental leadership, and the savings that come with it, are key for our region in reducing carbon emissions and improving air quality throughout the Sacramento region.

So, if buying or leasing an EV is something you're

considering, we'll provide information and resources to help you decide what's best for you.

Learn more about our incentive, special discount rate for EV drivers and other information at **[smud.org/DriveElectric](https://smud.org/DriveElectric)**. •

## Powering a sustainable future with clean energy

For more than 70 years, we've been an environmental leader in Sacramento and across the nation. Currently, our energy is about 50% carbon-free and we're on track to be 100% net-zero-carbon by 2040, 5 years ahead of California's goal.

We're taking the lead with investments in carbon reducing technology and offering clean energy programs for our customers. Learn more about our impact and environmental leadership role at [smud.org/CleanEnergy](https://smud.org/CleanEnergy). •
