

Residential SolarShares® Historical and Prospective Product Content Label¹

Residential SolarShares is sold by matching an estimated percentage of your usage annually. The information provided only applies to the portion of your SMUD bill covered by Residential SolarShares. In 2020, Residential SolarShares was made up of the following new renewable resources averaged annually.

Green-e® Energy Eligible New² Renewables in Residential SolarShares

	2020 Historical		2021 Prospective	
	%	Generation Location	%	Generation Location
Solar	100%	CA	100%	CA
Total Green-e® Energy Certified New Renewables	100%	CA	100%	CA

1. Prospective figures reflect forecasted renewables. We will report the actual resource mix of the electricity you purchased annually in the form of a Historical Product Content Label. These figures reflect the power delivered to Residential SolarShares customers in 2020 and the prospective power delivery for 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

* For comparison, the current average mix of resources supplying SMUD in 2019 includes: Eligible Renewable (27.8% (Biomass & Biowaste 6.7%, Geothermal 2.8%, Eligible Hydroelectric 1.3%, Solar 1.2%, Wind 15.8%)), Coal (0%), Large Hydroelectric (44.3%), Natural Gas (26.6%), Nuclear (0.9%), Other (0%), Unspecified Sources of Power (0.4%). This resource mix was prepared in accordance with CEC energy almanac available at:

<https://www.energy.ca.gov/filebrowser/download/3262>

In 2020, the average home in SMUD's territory uses 750 kWh per month. [Source:
