

Greenergy® Partner historic and prospective product content label¹

Greenergy Partner is sold in blocks of 1,000 kilowatt-hours (kWh) or by matching 100% of your electricity usage annually to commercial SMUD customers. The information provided only applies to the portion of your SMUD bill covered by Greenergy Partner. In 2018, Greenergy Partner was made up of the following new renewable resources averaged annually.

Green-e Energy Eligible New² Renewables in Greenergy Partner

	2018 Historic		2019 Prospective	
	%	Generation Location	%	Generation Location
Solar	100%	UT	100%	UT
Total Green-e Energy Certified New Renewables	100%		100%	

1. Prospective figures reflect the renewables that we forecast to provide. Actual figures may vary according to resource availability. We will report annually to you in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. These figures reflect the power delivered to Greenergy Partner customers in 2018 and the prospective power delivery for 2019.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved under a strict set of criteria as repowered and has been approved for extended use by Green -e Energy.

Note: The 2018 Prospective Product Content Label forecasted to provide 100% biomass. However, 100% solar was delivered.

* For comparison, the current average mix of resources supplying SMUD in 2016 includes: Eligible Renewable (20% (Biomass 11%, Geothermal 1%, Small Hydroelectric 1%, Solar 3%, Wind 4%)), Coal (0%), Nuclear (0%), Oil (0 %), Natural Gas (41 %), Large Hydroelectric (23%), and Other (16%). This resource mix was prepared in accordance with CEC energy almanac available at:

https://ww2.energy.ca.gov/pcl/labels/2016_labels/Sacramento_Municipal_Utility_District.pdf

Note: Due to rounding conventions, numbers may not add to 100%.
