## Greenergy® California Renewable Historical and Prospective Product Content Label[1]

Greenergy California Renewable includes California Renewable, Greenergy Standard, and Greenergy Neighbor. California Renewable is sold in blocks of 1,000 kilowatt-hours (kWh) or by matching a percentage of your electricity usage (50% or 100%) annually to residential and commercial SMUD customers. For Greenergy Standard and Neighbor, SMUD supplies blocks of 200 kilowatt-hours (kWh) of renewable generation from California. In 2024, Greenergy California Renewable was made up of the following new renewable resources averaged annually.

### Green-e® Energy Certified New Renewables[2] in California Renewable

| | 2024 Historical | | 2025 Prospective | |
|---|---|---|---|---|
| | % | Generation Location | % | Generation Location |
| Solar | 23% | CA | 50% | CA |
| Wind | 77% | CA | 50% | CA |
| Total Green-e® Energy Certified New Renewables | 100% | CA | 100% | CA |

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the next reporting year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased. Historical figures reflect the power delivered to customers in 2024 and prospective power delivery for 2025.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

* For comparison, the current average mix of resources supplying SMUD in 2024 includes: Eligible Renewable (40.0% (Biomass & Biowaste 2%, Geothermal 13%, Eligible Hydroelectric 1%, Solar 6%, Wind 18%)), Coal (0.0%), Large Hydroelectric (22%), Natural Gas (38%), Nuclear (0%), Other (0.0%), Unspecified Sources of Power (0%). This resource mix was prepared in accordance with CEC energy almanac available at: SMUD 2024 Power Content Label

In 2024, the average home in SMUD's territory used approximately 700 kWh per month. [Source: SMUD's 2024 5-Year Financial Summary ].

For specific information about this electricity product, please contact SMUD at 1-888-742-SMUD (7683), email customerservices@smud.org, or visit smud.org/Greenergy (residential) or smud.org/BusinessGreenergy (commercial).

Green-e Energy CERTIFIED

Greenergy California Renewable is Green-e® Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.

*The Green-e® Energy Standard requires that renewable electricity and RECs generated in or delivered to California must be matched with greenhouse gas (GHG) emission allowances retired on behalf of the generation. This ensures that California customers are using renewable electricity or RECs that contribute to GHG reductions above and beyond what is required by state regulatory policies. In 2024, the pool of free voluntary allowances from the state's Voluntary Renewable Energy Program (VREP) was depleted, and there is uncertainty around when more allowances will become available. The Green-e® Governance Board has approved a waiver allowing Green-e® certified products with VREP-eligible 2024 supply to not procure GHG allowances. As a result, California allowances were not retired on behalf of calendar year 2024 renewable MWh generation provided to customers of [certified product name], and it therefore supported compliance with state GHG reduction programs rather than going above and beyond statewide emissions regulations. To learn more about VREP, please visit the California Air Resources Board's website. To learn more about Green-e® certification, please visit green-e.org*

# Greenergy® Local Renewable Historical and Prospective Product Content Label[1]

Greenergy Local Renewable matches 100 percent of your electricity usage annually with renewable generation from the Sacramento region[2]. In 2024, Greenergy Local Renewable was made up of the following new renewable resources averaged annually.

## Green-e® Energy Certified New Renewables[2] in Local Renewable

| | 2024 Historical | | 2025 Prospective | |
|---|---|---|---|---|
| | % | Generation Location | % | Generation Location |
| Solar | 100% | CA | 80% | CA |
| Wind | 0% | CA | 20% | CA |
| Total Green-e® Energy Certified New Renewables | 100% | CA | 100% | CA |
