

Help us protect our beautiful trees

Non-processed firewood from outside is not permitted.

.....

Why not?

- **Stop the spread:** Invasive pests and diseases can hitch a ride on firewood and pose a serious threat to our trees.
- **Local is best:** Processed, certified firewood from local suppliers (like store-bought options) is safe for our environment.

How you can help

- **Be prepared:** Bring firewood from an approved supplier, like Hot Wood, or buy it onsite at our beach store. This way, you ensure it's safe for our park.
 - **Protect nature:** By following these guidelines, you help keep our trees healthy and thriving for everyone to enjoy.
-

Thanks for your cooperation to maintain the beauty of the park.
If you have any questions, please speak to our park staff.
We're here to help.
