Appendix L
REQUEST FOR INFORMATION - MAPPING

PG&E File #: 15-391
Wall Map/Plat Map #: 2587-A2, A3, A4
Address/Location: 8300 Biv. / G50 St

Dear: CEC

Enclosed are copies of PG&E's (gas and/or electric) distribution plat maps showing the approximate location of PG&E's facilities in the vicinity of the Agency's above referenced project. The location of the facilities as shown on the enclosed maps are for reference only and should not be relied upon to establish the actual location. Exact location of PG&E facilities and/or depth of any underground facilities can only be established by positive location method. I have attached a copy of PG&E's electric and gas mapping symbols for your use.

Please note these maps are not for public use and may not be reproduced or distributed without PG&E's written approval.

At this time PG&E cannot be certain if there are any direct conflicts with PG&E facilities, but as a precautionary measure, please instruct your contractor to contact the new, federally-mandated national "Call Before You Dig" number, 811, at least 48 hours prior to construction in order to have PG&E's facilities marked in the field.

Please note that your submittal of drawings for delineation does not constitute notification of construction or initiate a job for relocation. If you identify any PG&E facilities that may be in conflict with your proposed project please forward a written request along with your construction plans to PG&E to initiate engineering for rearrangement of those facilities that are in conflict.

Please keep in mind in any relocation of PG&E facilities may require the acquisition of additional land rights in order to accomplish a timely relocation of PG&E facilities. In order to meet your construction schedule timely acquisition of land rights will be essential in keeping the project on schedule.

Also, will this project be federally-funded and subject to the Buy America provisions under MAP-21?

In the event there are no conflicts with the project, please issue a "No Conflicts" Letter to Owner so that we may close out our project file.

If you have any questions or require assistance, please contact Shannon Hodges at SMHN@pge.com or myself.

☐ No PG&E Gas facilities within the project site.
☐ No PG&E Electric facilities within the project site.
☒ It appears that highlighted gas facilities located within your project may require special construction equipment weight limits when working over or near these facilities. Please contact our office 916-386-5546 to review those equipment weight restrictions.
Other Symbology Changes

In MET there was a hop over / jump over if mains are not tied, and no symbol if they were tied.

In GIS there will be a fitting (shown as one of the symbols on Symbology Document) if mains are tied and no symbol if they are not tied.

Legend
- Distribution Mains
  - High Pressure
  - Semi High Pressure
  - Low Pressure
- Cross
- Top Tap
- Bottom Tap

New (GIS)
- Mains Are Not Tied
  - High Pressure Mains Are Not Tied

Old (MET)
- Mains Are Not Tied
- Mains Are Tied
- Low Pressure Mains Are Tied with a Cross (or)
- High Pressure Mains Are Tied with a Top Tap (or)
- Semi-High Pressure Mains Are Tied with a Bottom Tap
