Promotes energy efficiency and sustainability with various programs and services offered by SMUD.

**Integrated Design Solutions**
SMUD offers free energy-efficient design assistance and financial incentives for new construction, major renovation and many types of tenant improvements. Request a free consultation before you design your project.

**Greenery**
We offer businesses an easy, affordable way to show their commitment to the environment by meeting their electricity needs with power from renewable and carbon-free resources.

**Net metering**
If you have qualifying renewable generation—such as a photovoltaic system—installed at your business, this option is for you. The renewable generation supplies your business’ electricity needs, which in turn reduces the electricity supplied by SMUD. Intermittent excess energy produced by the renewable energy system is sent back to SMUD and is reflected as a credit on your bill.

**Clear space**
You must leave 8 feet of clearance in front of SMUD’s green electrical boxes. This helps us work more efficiently, especially during a power outage. You may be charged if SMUD has to clear the space. You must also allow access to utility easements on your property so we can inspect and maintain our power lines and equipment.

**Power theft**
Our technicians encounter various methods of power theft each month. Unsafe conditions are a danger to all SMUD customers. Please report any unsafe situation you discover by calling 916-732-6594.

**Billing and payment options**
- **Custom Due Date**
  Set your payment due date range.
- **Go Paperless**
  View, track and pay your bill online with a digital bill.
- **Collective Billing**
  Combine multiple accounts onto a single monthly statement. Eligibility requirements apply.
- **Electronic Funds Transfer Program**

Your rate classification
As your community-owned and not-for-profit electric service, SMUD proudly provides rates that average between 35% to 52% lower than neighboring PG&E. These rates are for commercial, industrial, agricultural and lighting customers. To continually provide our customers with competitive pricing, our electric rates and options are extensive. This document summarizes these rates and options.

If you would like more information on any of these rates, please call Commercial Services at 1-877-622-SMUD (7683) or visit our web site at smud.org/Rates.

A look at your SMUD bill
Your General Services rate is identified by the Rate Category on your monthly SMUD bill.

Other services & rate options
Agricultural Time-of-Use (TOU) Rates
SMUD’s TOU rates may be beneficial for customers who can adjust their energy usage to off-peak hours.

Economic development
An economic development program is available to qualifying commercial customers locating, expanding, or retaining business in our service territory with a maximum demand of at least 300 kW. Incentives will diminish over a 10-year period and apply to the System Infrastructure Fixed Charge, Summer Super Peak Demand Charge and electricity usage charges on their bill. There is a larger discount for locating in a Disadvantaged Community.

Energy efficiency incentives & financing
SMUD offers a variety of incentives and financing for approved energy efficiency improvements, including qualifying lighting retrofits, HVAC upgrades, motor replacements, process system upgrade and refrigeration equipment.

Campus billing
This applies to eligible customers preferring to consolidate several accounts on the same campus.

Power factor adjustment
Customers with power factors below 95% may incur additional charges on their monthly bill. Customers may benefit from establishing a contract to pay a monthly waiver instead of the power factor adjustment.

Energy Assistance Program Rate (EAPR)
This is SMUD’S discounted rate for certified nonprofit agencies whose primary function is to provide sleeping quarters for low-income residents.
