As approved by the SMUD Board of Directors on August 20, 2020, the commercial rate restructure transition has been delayed one year, with the transition completing no later than May 31, 2022. Legacy rates will continue through 2021. See Resolution 20-08-06 for details.
I. Applicability

This Rate Schedule GS-TOD1 applies to single- or three-phase service, delivered at standard voltages designated by SMUD as available at the customer’s premises. This schedule is mandatory for all agricultural, commercial and industrial (C&I) accounts with monthly maximum demand of 1,000 kW or greater for three consecutive months during the preceding 12 months. Accounts will remain on this rate schedule unless monthly maximum demand falls below 1,000 kW for 12 consecutive months. The demand for any month will be the maximum 15-minute kW delivery during the month. This schedule is also mandatory for accounts with contract capacity of 1,000 kW or greater.

For the purposes of this schedule a “month” is considered to be a single billing period of 27 to 34 days.

A. Legacy Rates (closed after May 31, 2021)

1. The Legacy commercial rates will be closed to new customers as early as Jan. 1, 2021, and no later than May 31, 2021, as determined by SMUD.
2. Once a customer has been transitioned to the new restructured Time-of-Day rate, they cannot return to the closed legacy rate(s).

B. Restructured Time-of-Day Rate

1. Customers will gradually transition to the new restructured Time-of-Day rate as early as Jan. 1, 2021 and no later than May 31, 2021, as determined by SMUD.
2. Customers on the Legacy rate will gradually transition to the new restructured Time-of-Day rate as determined by SMUD beginning the first full billing cycle in January 2021 and complete transition no later than May 31, 2021.
3. The new restructured Time-of-Day rates will follow new rates nomenclature as determined by SMUD.

II. Firm Service Rates

**SACRAMENTO MUNICIPAL UTILITY DISTRICT**

Resolution No. 19-06-13 adopted June 24, 2019

Sheet No. GS-TOD1-2

Effective: January 1, 2021

Edition: January 1, 2021
III. Electricity Usage Surcharges

Refer to the following rate schedules for details on electricity usage surcharges that apply to all kWh.

A. Hydro Generation Adjustment (HGA). Refer to Rate Schedule HGA.

IV. Rate Option Menu

A. Energy Assistance Program Rate (EAPR) for Nonprofit Agencies. Refer to Rate Schedule EAPR.

B. Campus Billing. Refer to Rate Schedule CB.

C. Implementation of Energy Efficiency Program or Installation of New Solar/Photovoltaic Systems

Customers who implement a SMUD-sponsored Energy Efficiency program or who install a SMUD-approved solar/photovoltaic system to offset their on-site energy usage may request, in writing, within 30 days of the project completion and commissioning, an adjustment to their billing demand based on the anticipated reduction in kW from the Energy Efficiency Project Worksheet. The adjusted billing demand is valid for 12 months or until it is exceeded by actual maximum demand.

D. Generator Standby Service Option

Generator Standby Service applies when all of the following conditions are met:

1. The customer has generation, sited on the customer’s premises, that serves all or part of the customer’s load; and
2. The generator(s) are not fueled by a renewable resource; and
3. The generator(s) are connected to SMUD’s electrical system; and
4. SMUD is required to have resources available to provide supplemental service, backup electricity and, or to supply electricity during generator(s) maintenance service.

</tr>
<tr>
<td>Effective October 1, 2021</td>
<td>$7.50</td>
<td>$5.92</td>

</tr>
</tbody>
</table>

In addition to the Generator Standby Service Charge, SMUD will continue to bill for all applicable charges under this rate schedule, including, but not limited to, System Infrastructure Fixed Charges, Site Infrastructure Charges, Summer Peak Demand Charges, and electricity usage charges for SMUD-provided power.

The Generator Standby Service Charge will be waived for qualifying net metered generation. Refer to Rate Schedules NEM1 and NEM2.

E. Net Energy Metering Option. Refer to Rate Schedules NEM1 and NEM2.

F. SMUD Renewable Energy Option

SMUD offers optional programs that allow customers to receive renewable energy for an additional charge, detailed on www.smud.org.

G. Special Metering Charge

For customers who purchase and install additional equipment and software identified by SMUD meter specialists as necessary for load data collection and transfer to electronic media outside SMUD, SMUD will charge a monthly service fee to cover maintenance, software support and licensing fees. Payment for this nonstandard equipment and service will be made through provisions in Rule and Regulation 2, Section IV. Special Facilities. The fee schedule is available at SMUD’s website, www.smud.org.
V. Conditions of Service

A. Type of Electric Service
SMUD will provide customers on this rate schedule standard, firm service consisting of a continuous and sufficient supply of electricity.

B. Service Voltage Definition
The following defines the three voltage classes available. The rate shall be determined by the voltage level at which service is provided according to the following:

1. Secondary Service Voltage
   This service class provides power at voltage levels below 12 kilo-Volts (kV), or at a level not otherwise defined as “Primary” or “Subtransmission.”

2. Primary Service Voltage
   This service class provides power at a voltage level of 12 kV or 21 kV. To be eligible for Primary Service Voltage, the customer’s monthly demand must exceed 299 kW, the voltage must be available in the area being served, and SMUD must approve the arrangement for power provision.

3. Subtransmission Service Voltage
   This subtransmission service class provides power at a voltage level of 69 kV or as otherwise defined by SMUD. To be eligible for voltage service at this level, the customer’s monthly demand must exceed 499 kW, the voltage must be available in the area being served, and SMUD must approve the arrangement for power provision.

C. Power Factor Adjustment or Waiver

1. Adjustment (charge per month varies)
   Accounts on a demand rate are subject to a power factor (PF) adjustment charge. When a customer’s monthly power factor falls below 95 percent leading or lagging, the following billing adjustment will apply:

   \[ \text{Electricity Usage} \times \left[ \frac{(95\% \div \text{Power Factor}) - 1}{\text{Power Factor Adjustment Rate}} \right] \times \text{Power Factor Adjustment Rate} \]

   - \[ \text{Electricity Usage: the total monthly kWh for the account} \]
   - \[ \text{Power Factor: the lesser of the customer’s monthly power factor or 95 percent} \]
   - \[ \text{Power Factor Adjustment Rate} \]
     
     \[ \begin{align*}
     \text{Effective January 1, 2021} & \quad \text{...} & $0.0120 \\
     \text{Effective October 1, 2021} & \quad \text{...} & $0.0123
     \end{align*} \]

2. Waiver Contract (charge per month is set for the term of the waiver)
   Customers may apply for a power factor waiver contract that compensates SMUD for the power factor correction for the portion that is covered under the contract. The power factor waiver is not available to customers taking service at the subtransmission service voltage level. The waiver amount per month is calculated:

   \[ \text{Excess KVAR} \times \text{Waiver Rate} \]

   - \[ \text{Excess KVAR: Maximum 12-month KVAR in excess of 32.868 percent of kW} \]
   - \[ \text{Waiver Rate per excess KVAR} \]
     
     \[ \begin{align*}
     \text{Effective January 1, 2021} & \quad \text{...} & $0.3193 \\
     \text{Effective October 1, 2021} & \quad \text{...} & $0.3257
     \end{align*} \]
D. Large General Service Time-of-Use Billing Periods

   Winter
   October 1 - May 31
   On-Peak: Weekdays between noon and 10:00 p.m.
   Off-Peak: All other hours, including holidays

   Summer
   June 1 - September 30
   Super-Peak: Weekdays between 2:00 p.m. and 8:00 p.m.

VI. Billing

A. Meter Data

Meter data for service rendered in accordance with this rate will not be combined for billing purposes unless SMUD determines it is necessary or convenient to do so.
B. Proration of Charges

Charges are prorated when the billing period is less than 27 days, more than 34 days or spans more than one price. The System Infrastructure Fixed Charge, Summer Peak Demand Charge and Site Infrastructure Charge will be prorated as shown in the following table.

<table>
<thead>
<tr>

<td>Relationship between the length of the billing period and 30 days.</td>

</tr>
<tr>
<td>Price changes within billing period</td>
<td>Relationship between the length of the billing period and the number of days that fall within the respective pricing periods.</td>
</tr>
</tbody>
</table>

C. Contract Capacity

Use of Contract Capacity for billing is at SMUD’s sole discretion. Refer to Rule and Regulation 1 and Rule and Regulation 6.

D. Discontinuance of Service

Any customer resuming service at the same premises within 12 months after discontinuing service will be required to pay the System Infrastructure Fixed Charges and Site Infrastructure Charges that would have been billed if service had not been discontinued, except when service has been disconnected. The System Infrastructure Fixed Charge and Site Infrastructure Charge will be waived during each of those months. Retroactive billing shall be at SMUD’s sole discretion.
